21LEM202T — Unit 1, Session 1, SLO 1

Part B — In-Class Activity

Activity 1: Desire vs. State of Being

Tick your honest response in each column.

If there is a gap between what you want and your present state — why this gap? What are you doing to fill it? Is it getting filled or getting wider?

To be happy | **Yes** | **No**

To be prosperous | **Yes** | **No**

Continuity of happiness and prosperity | **Yes** | **No**

The gap exists because I often prioritize physical facility over relationships and right understanding. I am trying to spend more time with family and reflect on my values, but the gap is still wide due to habitual distractions.

	Do I WANT this? (Yes / No)	**Is this my STATE now? (Yes / No)**
To be happy	**Yes**	**No**
To be prosperous	**Yes**	**No**
Continuity of happiness and prosperity	**Yes**	**No**

Activity 2: Check Within Your Own Family

Question	**Your observation**
Is the unhappiness in our family more due to lack of physical facility, or more due to lack of fulfilment in relationship?	**The unhappiness is more due to lack of fulfilment in relationship, as arguments and misunderstandings occur even when physical needs are met.**
How much time & effort do I invest for physical facility vs. for fulfilment in relationship?	**I invest about 70% of my time and effort for physical facility (work, earning, chores) and only 30% for fulfilment in relationship (listening, spending quality time, resolving conflicts).**

Activity 3: Putting the Three in Priority Order

Number these 1–2–3 in the order of priority you would naturally accept, and write one line on why.

Requirement	**Priority (1/2/3)**	**Why?**
Right understanding (in the self)	**1**	**It is the foundation for clarity in relationships and proper use of physical facilities.**
Relationship (with human beings)	**2**	**It fulfills the need for mutual trust, respect, and affection, which is essential for happiness.**
Physical facility (with rest of nature)	**3**	**It is necessary for survival and comfort, but without right understanding and relationship, it cannot ensure continuous happiness.**

Part C — Reflective Worksheet (from today's session)

C1. Five key take-aways from today (most important first):

1.
2.
3.
4.
5.

1. **Happiness is a state of harmony within oneself and with others.**
2. **Right understanding is the foundation for all human aspirations.**
3. **Relationship and physical facility are both necessary, but right understanding gives them proper priority.**
4. **Human consciousness is distinct from animal consciousness in its need for continuous happiness and prosperity.**
5. **Education should aim at holistic development, not just skill acquisition.**

C2. Five key problems you notice around you (most severe first):

#	Problem	Due to lack of skills or values?	Increasing or decreasing?	Root cause (your view)	Solution (your view)
1	**Environmental degradation**	**Lack of values**	**Increasing**	**Greed and disregard for nature's harmony**	**Promote right understanding of our relationship with nature and sustainable living.**
2	**Rising stress and mental health issues**	**Lack of values**	**Increasing**	**Lack of right understanding and meaningful relationships**	**Include value education and self-reflection in daily life.**
3	**Corruption in society**	**Lack of values**	**Increasing**	**Prioritizing physical facility over right understanding and relationship**	**Strengthen ethical education and accountability systems.**
4	**Breakdown of family relationships**	**Lack of values**	**Increasing**	**Lack of trust, respect, and communication**	**Foster relationship skills and family time through education.**
5	**Unemployment despite degrees**	**Lack of skills**	**Increasing**	**Education not aligned with real needs and holistic development**	**Reform education to include practical skills and value-based learning.**

C3. Five things that give you happiness in continuity:

1. **Spending quality time with family and friends.**
2. **Engaging in meaningful work or study that aligns with my values.**
3. **Helping others without expecting anything in return.**
4. **Practicing self-reflection and meditation.**
5. **Being in harmony with nature, such as walking in a park or gardening.**

C4. Five things that make you feel unhappy:

1. **Conflict and misunderstanding in relationships.**
2. **Seeing injustice or inequality around me.**
3. **Lack of purpose or direction in daily activities.**
4. **Excessive focus on material possessions and competition.**
5. **Feeling disconnected from nature and my own inner self.**

C5. Based on today's discussion, what role do you see for yourself in the education system?

I see myself as a facilitator who helps integrate value education and holistic development into the curriculum. I can promote self-reflection, relationship skills, and right understanding among students, so that education nurtures not just careers but complete human beings. I also aim to be a lifelong learner, continuously aligning my own life with these principles.

Part D — Long-Answer Questions

Q1. For a human being, "physical facility is necessary but something more is also required." Explain the fundamental difference between animals and human beings on this basis.

Animals are primarily driven by physical needs — food, shelter, and reproduction — and their happiness is limited to the fulfillment of these needs. In contrast, human beings have the capacity for self-awareness and the aspiration for continuous happiness and prosperity, which requires not only physical facility but also right understanding and fulfilling relationships. While animals live in the present and are content with physical comfort, humans seek meaning, harmony, and lasting fulfillment, which cannot be achieved through material means alone.

Q2. What is meant by Holistic Development, and what is the role of education–sanskar in achieving it?

Holistic development refers to the all-round growth of a human being — physical, intellectual, emotional, social, and spiritual — leading to harmony within oneself, with others, and with nature. Education–sanskar (value-based education) plays a crucial role by providing both knowledge and the cultivation of right values, attitudes, and behaviors. It helps students develop right understanding, build healthy relationships, and use physical facilities responsibly, thereby enabling them to live a fulfilling and prosperous life.

Q3. Distinguish between living with Animal Consciousness and living with Human Consciousness, explaining the place of right understanding, relationship and physical facility in the correct priority.

Living with Animal Consciousness means being driven primarily by physical needs and instincts, where physical facility is given the highest priority, and relationships are based on utility or survival. In this state, right understanding is absent or minimal. Living with Human Consciousness means recognizing that while physical facility is necessary, it is not sufficient; right understanding is the highest priority, followed by fulfilling relationships, and then physical facility. In Human Consciousness, one seeks continuous happiness and prosperity through harmony within, with others, and with nature, and uses physical resources responsibly.

Self-Reflection (take home)

1. Are you able to see that your basic aspirations are for continuous happiness and prosperity?

Yes, I can see that my deepest aspirations are not for momentary pleasures but for a state of continuous happiness and prosperity, where I feel fulfilled and at peace with myself and my surroundings.

2. Can you see that to fulfil your basic aspirations, three things are required — right understanding, fulfilment in relationship, and physical facility?

Yes, I can see that right understanding gives me clarity about what is truly valuable, fulfilling relationships provide emotional and social harmony, and physical facility supports my basic needs. All three are necessary and must be in the correct priority.

3. Does our education need content and process to include all three? Evaluate present education and the way forward.

Yes, our education system currently focuses heavily on skills and knowledge for physical facility (career and material success), but largely neglects right understanding and relationship skills. This leads to stress, conflict, and dissatisfaction. The way forward is to integrate value education, self-reflection, and relationship-building activities into the curriculum, so that students develop holistically and are prepared to live a life of continuous happiness and prosperity.
